

How can ProjectMap bring your School Development Plan to life?

Your School Development Plan (SDP) is a key document and provides the foundation for the effective strategic management of your school. Multiple file storage and paper copies of key documents for example: actions plans, updates and impact evidence can be difficult to manage, making review and reporting time-consuming.

Having listened to feedback from head teachers and Governors about what is needed and useful, ProjectMap provides a clear process and structure to support the implementation and review of your SDP. Incorporating audit, action planning, evidencing impact, assessing risk and monitoring progress, ProjectMap keeps everything safe in one easy to use and cost effective online system.

ProjectMap enables you to assess your current position referencing your strategic aims/framework and develop an action plan to inform your work. You can store your evidence, linked to the framework and set permissions to enable access for review by key staff and Governors.

How does ProjectMap work?

- **Assess where you are against each element of your strategic plan.**
- **Add actions to create a live action plan.**
- **Upload Evidence of progress and impact to inform decision making and review**
- **Manage risk - incorporates a free easy to use Risk Register**
- **Review and report on progress – previous reviews are saved in the system.**

From working with and listening to schools requirements we have designed a generic framework and added useful “Guiding Questions”, which can be adapted to meet your individual needs. We recognise that every school has different priorities; we will work with you to bespoke your system adding your framework, key strategic aims and/or targets.

What does is cost?

The basic subscription price for ProjectMap is:
1 year £195 (+ vat), 3 years £395 (+vat) (paid upfront)

+ Additional set up costs in the first year subject to a discussion of your requirements.

How do I find out more and see a demonstration?

ProjectMap is easy to use and we can show you a generic system in an initial on line demo in around 20 minutes. If you decide to go ahead we can discuss our individual requirements and visit you at school if that works for you. We have a transparent pricing policy and will provide a full breakdown of any additional costs at any time – please just ask.
